

Restaurant Website Firm Announces Three Investments to Attract Customers and Boost Revenue

November 29, 2016

November 29, 2016 - PRESSADVANTAGE -

Restaurant Boosters offers proven plans to increase restaurant revenue through increased visibility online. The restaurant and bar marketing plans attract customers on Google, Bing and Yahoo.

London UK: Restaurant Boosters is pleased to announce the implementation of their plans for capturing the attention of the many potential customers daily who use mobile devices, web searches or social media sites to determine where to find food or drinks at a convenient or nearby location. The services of the firm are free of commissions and can be implemented quickly, usually within 72 hours. Increased visibility online means increased revenue to the restaurant or bar, the company says.

According to a spokesperson for the professional restaurant marketing firm, "We have the knowledge and experience to add an easy-to-use Facebook ordering and reservations directly into the restaurant or bar business's Facebook page. Your customers can order for delivery, pick up and make table reservations without leaving Facebook. Your business can take advantage of unlimited orders and reservations with zero commission."

The restaurant success team can create even more opportunities to be seen online, with the establishment of an aesthetically appealing restaurant website. The new site will set the right tone with potential customers and provide the business with instant credibility. The professionals at RB will build a Google-approved website for the restaurant or bar to convert visitors to the website into loyal customers using smartphones, desktops or tablets. The design is both attractive and usable across a range of mobile or desktop devices.

The professionals at the restaurant marketing firm guarantee secure hosting and site maintenance so the customers can always find a response to inquiries or reservations. The key to business success is communications and the restaurant success team is always available to provide answers and support throughout the set-up as well as the maintenance process.

The set-up process is fast, easy and uncomplicated. The new features will be generating revenue in three to

five days. The entire set-up process is handled by the RB professionals.
