

Ministry of Justice in Romania Authorizes Professional Translators Team

November 30, 2016

November 30, 2016 - PRESSADVANTAGE -

Romanian-based translation services include a strong team of professional translators authorized by the Ministry of Justice. The team specializes in several foreign languages, including English, Spanish, and German.

The Authorised Translator is pleased to announce the establishment of their highly qualified team of professional translators. The professionals are authorized by the Ministry of Justice. They are able to translate several foreign languages, including English, Spanish, and German. The competency is in several different professional areas, including legal, economic, technical, financial, medical, publishing, IT, commercial, marketing, advertising and multimedia. All translators provide professionalism, seriousness, and efficiency in completing translation projects.

An authorized translator in Romania is carefully selected for their promptness, competence, and experience to date. Each applicant for the professional team is required to successfully pass a language test in order to prove that they meet all the necessary qualifications of a competent translator. Once the fairly rigorous recruitment process is completed, translators who have been selected to be part of the team are available to respond quickly and to assist in overcoming any language barrier.

According to a spokesperson for the translation service, "Our team will ensure that each project or document received will be treated with maximum reliability, each submission deadline agreed with the client will be respected, and that services will meet the quality requirements of the client. We offer high-quality translations, quick response, and extremely advantageous prices."

In today's global economy, more cross-language transactions are occurring. The need for accurate and timely translations of legal and business documents is a growing concern. The sharing of information in fields such as research, medicine and health and energy requires translation in accurate terms. Translation is also needed in the fields of communications, education, transportation and agriculture.

The trained professional team is able to respond quickly and accurately to the need for documents and communication in written form in various major languages. Recruitment and assessment criteria are maintained at a high level in order to ensure that the completed documents meet the highest quality standards.
