

Phone Systems Provider Synergy Telcom Announces New Service For Cell Phones.

May 27, 2015

May 27, 2015 - PRESSADVANTAGE -

Indianapolis, IN ? Synergy Telcom is pleased to announce new service on Refurbished Cell Phones.

Synergy Telcom has just recently announced that they are repairing cell phones as part of their service and they can help individuals and large companies. In addition, they are also selling refurbished cell phones at a significant discount.

The refurbished phones come from a variety of sources. Some were returned within the guarantee period or sent to Synergy Tel because of new models. The phones work perfectly with Synergy Tel 7 step factory refurbished program.

The phones are newer and older models which have been recycled or donated to charity as the customer upgraded to a new model. Few are also returned to the manufacturers due to a malfunction, and Synergy Telcom makes sure that their refurbished phones for sale are all in perfect working order.

These services regarding refurbished cellphone sales and cell phone repair is part of a set of services offered by Synergy Telcom to companies. These include streamlining and automating the RMA processes, which is part of the procedure for returning the phones for repair or replacement.

The advantage of buying refurbished phones or having cell phones repaired instead of replaced can be considerable in financial terms. Each refurbished phone represents a significant amount in savings, and in large numbers the amount saved can be huge.

?Replacing cellphones is an easy task if you have the right company to help, we want to be that company.? says Les Walker of Synergy Telcom. ?The cell phones we fix can work just as well as brand new models, and this is why we offer refurbished cell phones for sale.?

About Synergy Telcom:
