

Pokemon Go Account Website Announces Official Launch

December 19, 2016

December 19, 2016 - PRESSADVANTAGE -

ShopThePokeStop is a website that offers Pokemon GO accounts to players. The website has recently announced its official launch and they have stated that they carry a number of Pokemon GO accounts for interested buyers.

Ryan Ahuja with the company says, "Ever since Pokemon GO began, our team has been available to offer services to trainers all around the globe. Our customers can trust that we have the expertise needed to get you the accounts you want."

The company states that they offer only safe Pokemon GO accounts, which have passed ban-testing by Niantic LLC. Ahuja says that these accounts have overcome a number of odds that other accounts have not.

Ahuja says, "We are pleased to bring our customers only the very best quality of accounts. Level 20 accounts come completely loaded and are ready for you to compete as soon as you set them up." Ahuja says that more information about the company and the accounts they offer can be seen on their official Google+ page.

The company states that most of the accounts they have for sale come with region specific Pokemons as well as Charizards, Dragonites, and other popular playing characters. Ahuja says that they offer affordable accounts for the avid player and record all details of the account upon purchase so that buyers have a clear and concise choice of the best account for their playing needs.

With each account, players are permitted to choose or change nicknames, pick teams, spend unused candy or stardust, evolve Pokemon, and use any accumulated lucky eggs and incubators. The company states that their team is constantly field testing new strategies of creating the best place to purchase services, and are offering a free gift for all purchases over \$25 to celebrate their new website launch.

On the website, in addition to listing various accounts for sale, the company also offers a blog with tips and advice for playing and leveling up. They state that they use every precaution to ensure that accounts are safe and legitimate for players. Those interested can learn more by visiting the official ShopThePokeStop website or by connecting with the company on social media.
