White Mulberry Tea Sees Surge In Demand

January 04, 2017

January 04, 2017 -
White mulberry is a powerful natural product that is used as a remedy against a range of ailments all over the world. Since the Dr. Oz show about White Mulberry Tea in 2014, many sellers of this ancient Chinese herbal tea have come and gone. However, the original white mulberry tea that was featured on the Dr. Oz show, produced by The Immortalitea Company, which is based in Grandville, MI, continues to be in high demand. In fact, the company has had difficulties over recent months to meet the rising demand from their customers.

"Our white mulberry tea has been popular since 2014, when it was featured on Dr. Oz," says Margo Chupeido from the Immortalitea Company. "As with anything that gets Dr. Oz's attention, there was a huge surge in demand, which gave rise to many companies offering white mulberry tea, but not really paying attention to the quality. We are one of the few companies that are still around now, as well as being the original one. And we are happy to see that the rise in companies producing low quality tea has not depressed the demand for this powerful herb. Rather, people now search for high quality, which is what we offer."

The health benefits of white mulberry have been significantly researched, long before they are discussed on the Dr. Oz show. White mulberry is full of fiber, protein, and strong antioxidants. It is a small fruit, but a very powerful one that has been demonstrated to fight heart disease and cholesterol. Furthermore, research has shown that the leaves of the white mulberry help to control the way the body digests sugar.

Over the past three years, The Immortalitea Company has received hundreds of positive reviews for their product, and they are working very hard to make sure they continue to be able to meet demand for their customers. "Talk about healing tea," says Daniel on the company's website. "This tea has helped me tremendously. I feel more calm and have less headaches in the morning after eating my oatmeal or anything that's been sweetened. This tea is very light and flavorful. I enjoy drinking it alone or mixed in my cereals and smoothies for a boost throughout the day. My mother said she noticed a change in her health state after a week of drinking. She says that she feels even more calm as opposed to the normal stress of high blood pressure. So we will keep this tea in our daily regimen."
