ExclusivelyHybrid.com Announces New Toyota Prius Hybrid Battery Replacement Service

May 29, 2015

May 29, 2015 -
Exclusivelyhybrid.com announces a new mobile hybrid car battery replacement service for South Florida Drivers.

Hybrid cars are growing in popularity here in the USA and the trend only looks to gain momentum in the years to come. Many of the top auto manufacturers including Toyota, Honda and Lexus just to name a few have gotten serious about making a mark in the hybrid car market. With the growing amount of options it is becoming more and more popular to own a hybrid vehicle these days and with that comes some new challenges not usually experienced with typical car ownership.

One of the common issues facing these drivers is the hybrid battery itself. Due to the unique technology being used the battery can and will run out of power and needs to be handled differently than your typical car battery when being repaired or replaced. The challenge is that, since the technology is still relatively new, very few auto mechanic professionals have been trained properly to work on these hybrid batteries. As a result, almost all hybrid owners resort to taking the car back into the dealership to have the battery serviced. This can at times be a tricky situation because, while the dealership mechanics are trained to handle hybrid

batteries, the costs associated with the dealership can in many cases outweigh the benefits of having them help you. This puts the owner in a difficult situation. For example, they need the car to get to work but they can?t afford to have the battery repaired or replaced at the dealership and they don?t know what else to do.

Well the good news is now these hybrid drivers have options. Exclusively Hybrid is South Florida?s premier hybrid battery repair and replacement service and they have just announced a new mobile service to help people who can?t afford the dealership but need to get back on the road. Currently, the company has a workshop in Lake Park, FL and has several options for hybrid auto owners. The first option is if you want you can ship your car to the workshop and the experts at Exclusively Hybrid can work on it there to resolve the issue with the battery.

Our new mobile service provides you a second option if you happen to be within a 150 mile radius of the Lake Park, FL facility. Simply contact Exclusively Hybrid and they will send a member of the new Mobile Division to drive to your location and help repair or replace the hybrid battery there. In either case and in 99% of the scenarios, working with Exclusively Hybrid can save you a considerable amount of money when compared to your other options not to mention the fact that the owner will have the option of a 1 to 3 year warranty on the battery depending on which battery they choose.

?We feel that with our unique combination of professional quality services and affordable rates, Exclusively Hybrid is perfectly positioned to help the growing demand for Hybrid battery repair and replacement services in South Florida.? says Alex Valler, Founder of Exclusively Hybrid and ExclusivelyHybrid.com

The company specializes in the rebuilding, reconditioning and installation of hybrid batteries for vehicles including Honda, Toyota and Lexus. The highly trained hybrid battery experts take specific actions to rebuild the entire battery and not just replace the individual parts and by doing so provide the best possible services to the hybrid owner. The new Mobile Division is already bringing in rave reviews:

?When the hybrid vehicle battery in our 2005 Prius died, the dealer's repair cost was beyond our means. We were in despair. Then we found Exclusively Hybrid. Alex came to our rescue with prompt, efficient, trustworthy service, offering far better repair terms and products than we could find anywhere else. Best of all, Alex makes house calls! The entire repair took place in our driveway, saving us time, anxiety and aggravation. The car is running like new and we are thrilled. Thanks, Alex! You are our hero!? Susan Montgomery

So if you are in South Florida and you find yourself in need of the hybrid battery repair and replacement services offered by Exclusively Hybrid, you can use the contact information below to get help.
