

ExclusivelyHybrid.com Launches New Toyota Prius Hybrid Battery Repair and Replacement Service

May 29, 2015

May 29, 2015 - PRESSADVANTAGE -

Exclusivelyhybrid.com announces a new Toyota Prius hybrid battery replacement service for South Florida.

Toyota Prius drivers in South Florida now have a new service available to them that can help make it easier and less expensive to repair or replace their hybrid battery. The Prius is a very popular and well known model and has grown in popularity in recent years as the public becomes more and more aware of the benefits of this hybrid technology. What most drivers are unaware of is the fact that the battery in a Prius Hybrid car is different than that of your average automobile. This has become evident with the emergence of the recent surge in demand for hybrid battery replacement and repair services.

Consumers need to know that it's not as easy to fix the battery of a hybrid as it is a typical car battery. For one thing the battery uses a different technology and therefore requires special training in order to service it properly. The challenge is that very few auto mechanics understand how to repair or replace these hybrid batteries effectively and this leaves Prius owners with only one option which is to bring the car back to the Toyota dealership and let the technicians there work on the battery. This works but the costs of such a visit can be prohibitive since there are few technicians available that are trained in this area and the demand is

increasing for the repair services. It is this scenario that has created the need for an affordable reliable hybrid battery repair and replacement alternative service for Prius owners.

This is where Exclusively Hybrid of South Florida comes in. The company specializes in repairing and replacing hybrid batteries. Alex Valler, the owner of Exclusively Hybrid and ExclusivelyHybrid.com, believes that the company has the ability to fill the demand for these services in the local and regional South Florida Market and early reports from happy customers seem to be confirming his sentiments:

?When my 2004 Prius batter died, I didn't know where to turn. The dealership was trying to charge me a ridiculous price for a new one, and the warranty wasn't that great. But Exclusively Hybrid was perfect. He came out to my house and did the whole thing in an hour. And when the new battery had issues caused by a car accident, he replaced it again for free. I wouldn't take my car anywhere else! Mike

Obviously there is a growing desire for these services and it looks like this demand will only be increasing in the years to come as the hybrid technology evolves and the general public becomes more and more aware of the benefits of the technology. The Toyota Prius was the popular pioneer of the hybrid technology and therefore has seen many requests for battery servicing.

?Exclusively Hybrid is the perfect solution for Toyota Prius owners who need professional quality services at affordable prices? says owner Alex Valler.

?You can ship your car to our shop in Lake Park, FL, drop it off if you are local or we can come to you with our mobile service if you are within 150 mile radius of our facility. Either way we can help.?

If you are in South Florida and you need help with repairing or replacing your Toyota Prius hybrid battery, Exclusively Hybrid may be a good option for you.
