Pearl City Dentist Receives Best Dentist In Hawaii Award

June 01, 2015

June 01, 2015 - PRESSADVANTAGE -

Kaka'ako Cosmetic Dentistry announced that they are the recent recipients 2015 winner of Honolulu Magazine's "Best Dentist in Hawaii" Award. Kaka'ako Cosmetic Dentistry is a dental clinic headed by the award-winning dentist in Pearl City.

"We, at Kaka'ako Cosmetic Dentistry have always strived to provide the best dental services in the industry for our patients, and it was such an honor when Honolulu Magazine formally acknowledged our efforts," exclaimed Dr. Gerald Adachi, who graduated from USC before receiving his Dentistry Degree from the Ivy League University of Pennsylvania School of Dental Medicine. "This award will only spur us to improve our efforts continuously."

Dr. Gerald Adachi is the sole dentist at Kaka'ako Cosmetic Dentistry, where he leads the team that includes a practice administrator, a clinical supervisor, and a couple of dental hygienists. Yet the clinic offers a wide variety of services, including general, cosmetic, and restorative dentistry.

The range of general dentistry services at Kaka'ako Cosmetic Dentistry goes beyond the usual tooth

extraction. It also includes root canals, customized nightguards to protect teeth from grinding during sleep, and periodontal therapy to heal periodontal disease," said Hawaii cosmetic dentist, Dr. Adachi, "for restorative dentistry, patients can receive crowns, inlays, onlays, bridges, dental implants, and dentures that are also supported by implants. A course of treatment for Temporomandibular Joint Dysfunction is available as well. Cosmetic dentistry services are numerous too, and they include teeth whitening, gum contouring, tooth bonding, and tooth colored fillings. Patients can also receive porcelain veneers, crowns, and bridges."

All these services are supported by the use of the latest dental technology. Digital photography is used for instant cosmetic imaging as well as to track progress of treatments. Digital radiographs are now used instead of old-fashioned film-based x-rays, and intraoral cameras can display the teeth on a video screen so that patients can better understand their treatments.

Among Dr. Adachi's achievements is serving as Chair of the Dental Education Program Committee for the Hawaii Dental Association, of which he is a member. He is also a member of the American Dental Association, Honolulu County Dental Society, and the Academy of Dentistry Internationale. He is a Fellow at the International College of Dentists and the Academy of Dentistry Internationale, as well as a mentor at the Terry Tanaka Study Club. For further information, contact Kaka'ako Cosmetic Dentistry..
