

Motagistics Announces Software Product Launch

December 28, 2016

December 28, 2016 - PRESSADVANTAGE -

St. Erie-based software development firm, Motagistics, offers streamlined small and medium business solutions for vendors. The company is an innovator of Enterprise Resource Planning (ERP) software.

St. Erie MI: Motagistics is pleased to announce the launch of their streamlined software solutions for small and mid-sized businesses. Rapidly growing businesses have a number of needs which allow them to achieve speed scale and agility. The software is appropriate for clients from seed to sale and integrates applications, automation, functions and requirements related to technologies and human services. The suite has been made possible through collaboration between White Hat LLC and Keystone Validation Group Inc. The new product launch by Motagistics assures customers of quality management of all aspects of their business.

White Hat of Erie, Michigan has been providing web-based IT solutions, deployment of apps, marketing and design in industries including manufacturing, realty, radio, news media, human resources, sales and distribution. The company has provided dispensary software, POS, web interfaces, ecommerce and menu systems to more than twelve hundred clients since 2011.

In 1999, Keystone Validation Group was founded and has been focused on regulatory compliance consulting services since. The Northumberland, PA firm emphasizes development and validation of computerized systems within the pharmaceutical, biotechnology and medical device industries. Some of the company clients include Amgen, Baxter BioScience, Bristol-Myers Squibb, Centocor, Lonza, Medarex, Merck & Company, Morphotek, Schering-Plough, Sanofi Pasteur and Pfizer.

The seed to sale software has a number of features which make it useful in various industries. The product is secure, fast and reliable, and provides cloud-based apps for any Android or iOS devices. The software is easy and convenient to use and is compliant with regulations and laws. The point of sale system is always available to users, whether or not there is an internet connections. The POS system is still operational. Other features which are part of the software suite include delivery management, website builder, product inventory and allocation. Inventory management and a built in loyalty program recognizes long-term customer relationships.
