Australia-Based Firm Expands Marquee Line

December 28, 2016

December 28, 2016 -
Australian Flag Makers offers a range of promotional materials, banners and marquees to businesses and organisations around the globe. The company produces high quality custom printed booths on aluminium frames with maximum visibility.

Brendale QLD: Australian Flag Makers and Ben Beazley are pleased to announce that the custom printed marquee line is available in customised colours and designs to suit the needs of the customer. The back side walls and roof of the canopy are constructed of high quality and durable 600D polyester with PVC coating The custom printed cover fits over a lightweight but sturdy aluminium frame. The rolling cart which holds the unit means that it can easily be transported to the location where it will be set up.

The covers and walls of the printed marquees Brisbane business customers need, help to make the unit colourful. They also ensure that the coverings are long-lasting. The dyes that are used are resistant to the ultraviolet rays of the sun so they don't fade the brightness and the visibility of the logo, message or graphics. The walls and canopy contain the advertising or announcement message which will catch the attention of passers-by.

The messages will stick in the memory of the the potential customer to be called up when he or she is looking for the specific product or service. The booth can be set up anywhere that people are congregated, indoors or outdoors. As they walk by, they will see the message which is conveyed on the canopy and walls of the unit.

The framework of aluminium is easy to set up in any place where it is needed. Trade fairs, corporate events and even pavement or parking lot booths benefit from the protection against the rays of the sun and even rainfall. When set up indoors, the booth provides a distinction from other activities which might be going on in the same area. When the need for the booth is over, it can be broken down quickly, and carted away to storage, or to the next location where it is needed.
