

REMOVE A POOL

Annapolis Contractors Recommend Winter Pool Removal

January 03, 2017

January 03, 2017 - PRESSADVANTAGE -

Pool removal contractors based in Annapolis MD recommend removing pools during winter months. The professionals can prepare back yard spaces for spring and summer enjoyment.

Annapolis MD: Remove A Pool and Don Handy are pleased to announce that they have the knowledge and experience to properly remove unwanted pools from yards and gardens. Pools can be removed at any time, but when they are demolished during the winter months, it creates less havoc in the outdoor living activities. The actual demolition is done with the least possible amount of disruption to the life of the homeowners. Depending upon the type of demolition, the pool is destroyed and covered up or removed with no lasting indication of where it was located.

According to a spokesperson for the company, "If you ask for information about pool demolition contractors near me, we can supply the answers you need. Annapolis-based pool demolition contractors, provide multiple services surrounding the destruction of all types of pools from in-ground to above-ground structures. We can

completely remove all evidence of unwanted pools and even replace the grass or sod if desired.?

Maryland pool removal contractors are not limited by cold temperatures, or even by snow on the ground. In fact, they are prepared to get rid of pools which are broken, worn or unwanted during the winter months, as easily as during summer months. The decision to remove or destroy a pool can be made for various reasons. The homeowners might want the yard space for other purposes. The pool may require more upkeep than is convenient or financially reasonable.

Once the decision to eliminate the pool is made, the contractors will offer a quotation for the price to remove the structure. An in-ground pool can be broken up and hauled away. The hole can be filled in with dirt or broken up chunks of concrete. Above ground pools can be carried away. The site of the pool is leveled and can be covered with sod so that when the Spring season arrives, the grass will be attractive in the spot where the pool was located.
