

In Response To Small Business Growth, Leku Percival Announces Earn To The Max

June 08, 2015

June 08, 2015 - PRESSADVANTAGE -

Author and marketing performance strategist, Leku Percival, of Earn To The Max reveals how small businesses not major franchise or corporate giants who spend millions on branding, don't have to worry. He recently revealed how the average business owner can use a low risk, higher strategy to earn as little as 25% in profits in the next twelve months.

"Let's face it, times are tough for the average small business that believes in investing in a website, flyers, a business card, a radio ad, or even the yellow pages, will give them more sales." says Percival. "The market is more unpredictable than ever. That's what the average business owner must think differently about where to find profitable investments."

Jay Abraham, famed marketing consultant and business growth strategist, often speaks about the importance of thinking differently to get an edge.

"You are surrounded by simple, obvious solutions that can dramatically increase your income, power, influence and success. The problem is, you just don't see them," Abraham stated.

"When major companies budget for their advertising, they put millions of dollars towards emphasizing their brand. Small businesses have neither the luxury nor finances to do this type of advertising. The smart business owner demand exceptional returns. We invest in asset based marketing to measure our advertising and scale what works. The average business owner does not have any idea about the gems and opportunities hidden within their businesses.? Percival shares the benefits of his knowledge, experience and research.

Percival's strategies are not only theory as he's been delivering this service to average business owners for years.

J.D. Beardall stated, ?Our business was suffering. I was about to file bankruptcy. Through reactivating my past customers, I was able to create \$10,000 in orders in one week and consistently \$1,000 a day without any expenses whatsoever. Thank God!?

?25% of our 100% increase in revenue came from marketing partnerships and alliances. By implementing all 7 steps of the system, we grew from 3.5 million to over 7 million in 12 months.? Said Mark Kastleman, a financial advisor.
