Thyroid Health Club Launches New Product For Thyroid Health Support

January 17, 2017

January 17, 2017 -
Los Angeles, California based Thyroid Health Club has recently released a new product that is designed to help people with hypothyroidism. The company states that it has introduced its new thyroid supplement onto the Amazon marketplace.

"It is estimated that around 20 million Americans are currently facing some sort of thyroid disease," says Dr. Obada Yousif with Thyroid Health Club. "More than 12 percent of the total population of the United States alone will likely develop some sort of thyroid condition during their lifetime, and many of those who have thyroid disease are completely unaware of their condition until it worsens significantly."

Dr. Yousif states that hypothyroidism is an underactive thyroid, and the condition can lead to a number of symptoms. Patients diagnosed with the medical condition typically complain of constipation, as well as lack of energy, depression, fatigue, hair loss, dry skin, weight gain, and a number of other ailments. Hypothyroidism is caused by the thyroid gland not producing enough thyroxine and triiodothyronin, both of which are important hormones that help to regular metabolism and provide a number of additional benefits.

"When the body does not get enough of these hormones, it begins to show in any number of symptoms," says Dr. Yousif. "Overall thyroid health is crucial in order for you to look and feel your best at all times and an underactive thyroid can be detrimental to your physical and mental health."

Dr. Yousif states that the Advanced Thyroid Support supplements offered by Thyroid Health Club are the product of many years of research to ensure that they contain the proper ingredients, which include a selection of herbs, minerals, and various amino acids. These have been observed to help enhance the health and function of the thyroid. He states that when used correctly, the supplements can help the patient to achieve optimum thyroid function on a permanent basis.

Those who feel they may suffer from this condition and who are interested in learning more about hypothyroidism and how it affects the body or more about the thyroid health supplement offered by Thyroid Health Club can visit them on their official website or see their official Amazon marketplace seller's page.
