

## **Miracle Shelves.com Launches New DIY Shelving Kits**

*February 21, 2017*

February 21, 2017 - PRESSADVANTAGE -

An Orlando, Florida based company has launched a new product for shelving. Miracle Shelves Store launched early in January 2017, offering pull out shelving systems for DIY customers. RJ Shaw, founder and owner of the company says, "I got the idea initially when helping my grandmother to install shelving in her home. We now ship custom cut shelving or standard sizes to DIY enthusiasts to retrofit on their own."

Shaw states that the company currently offers shelf kits that can fit all standard kitchen, bathroom, and other home storage spaces. The depth sizes come in three, five, or seven inch walls. Those interested in seeing the products and gaining more information about the company can visit them online on the official Miracle Shelves website.

"We hope that do it yourselfers and even contractors will find our shelving systems to be more than useful," says Shaw. "We have designed them to be easy to install, and you can fit them into a number of spaces, whatever you need, and they make adding shelving much more affordable by giving you the option of doing it yourself."

Shaw states that the company does plan to offer a number of new products in the future, but did not state what those products would be or when they would release them. He did state that customers who are

interested in learning more can visit them online to receive updates via their website about any new products that will become available in the future.

The website, which can be seen at <http://www.miracleshelves.com/>, offers information about the relatively new shelving systems, which Shaw says are revolutionary in the industry. He states that customers who want to save money on home renovations can use the storage solutions to add the additional space that they need without having to pay contractors or builders for the task. The shelving systems are available now for purchase and Shaw states that they ship to customers throughout the United States. Those interested can learn more about how the new shelving systems are installed and get specific size information on the company's website.
