Professional Dentist London Smile Cliniq Team Establishes Comprehensive Dental Care

January 18, 2017

January 18, 2017 -
The dentist London clinic professionals offer a full range of services in London and surrounding area. The award-winning dental team has the knowledge and experience to perform top tier dental procedures.

London UK: Smile Cliniq is pleased to announce that it has a fully equipped and staffed dental care clinic for London area residents. The dental team offers everything related to dentistry, from oral hygiene to oral surgery. The practice has been the recipient of several awards (Best Dental Practice London & Best young London Dentist) for the quality and professionalism of their work. The professionals offer state-of-the-art affordable dentistry with value for money treatments. Only evidence-based materials and techniques are used by the expert clinicians.

The dentist London professional team is highly trained, but also has the compassion and courtesy to make each patient feel as if they are in the best hands for any dentistry work that must be done. The clinic is a full service facility where all of the needed dental care techniques are available. General dentistry includes a range of procedures which encompass everything from prevention of tooth decay to identification of problems with teeth and gums. The dentists also check for oral cancer signs.

Patients who are concerned about the aesthetics of dental fillings can arrange for white fillings. The fillings which are installed are less obvious than the ?silver? or black amalgam type fillings. The white fillings are particularly appealing for individuals who need work on the front or visible teeth.

Cosmetic dentistry is dedicated to the appearance of the teeth and mouth. Veneers cover up a multitude of problems in the color and shape of the individual teeth. They are designed to be affixed to the surface of the teeth with an attractive and natural appearing thin ceramic cover. Other efforts to improve the appearance of the teeth include whitening of the teeth. Basic oral hygiene is designed to remove organisms and elements which can affect the health of the entire body. Clean teeth and gums are a necessary element of oral health.
