

California Health Insurance Solutions Launches New Website to Provide Health Insurance Quotes, Medicare Plan Quotes, and Accident Plan Quotes

June 04, 2015

June 04, 2015 - PRESSADVANTAGE -

Insurance agent Thomas Wilson of California Health Insurance Solutions has recently launched a state-of-the-art mobile-friendly website that includes easy-to-use features.

Since over 50% of all online searches now originate from mobile devices, it is all but mandatory for all websites to be responsive in nature to give those accessing the site on mobile devices the best possible experience. The site optimizes itself automatically to fit the size of the user's browser.

"By creating an inviting and beautiful new website, people will have access to the best information about their insurance options," Tom Wilson said. "People can make contact through the site or call for more information. Health insurance is very confusing to people and every situation is different and highly personal. People are encouraged to call for a consultation before they do anything."

The new website was launched in May and gives residents of California free, no-obligation health insurance quoting, Medicare plans quoting, and the VBA (Value Benefits of America) Accident Plan With M.D.hotline.

Important Information:

People will pay the same amount for a policy whether it is purchased through an insurance company directly or through an independent agent. A big advantage to using an independent agent rather than going directly through an insurance company is that people can choose from many different companies rather than just one. If people have any problems with premium payment issues, claims, or anything else, they can call the agent for help. Don't work with an agent who can only offer one choice, including calling an insurance company directly. An independent agent can explain the strategies that will help the client. People can benefit from a friendly knowledgeable staff and rest assured that the best available price is being offered. When people go online and fill in information to get a quote, the quote often goes to a lead generation company that

sells the information to 5, 10, or 20 (or more) different agents. The phone will ring off the hook with phone calls from insurance agents for the next week or two.

About VBA (Value Benefits of America) Accident Plan with M.D.hotline:

There are two main benefits to this plan.

One is the Accident Plan that helps pay for out-of-pocket medical expenses due to an accident. That includes hospital emergency room visits, hospital admission, doctor, surgeon, lab tests, x-rays, and ambulance, including Emergency Helicopter Air Ambulance.

The benefits are paid directly to the policyholder or to the provider. The entire family can usually be on one plan.

The second benefit is M.D.hotline. M.D.hotline gives the policy holder access to a doctor 24 hours a day, 7 days a week. The doctor can diagnose a condition, recommend treatment, write a prescription (if necessary) and send it to a pharmacy. If a referral to a specialist is necessary, the doctor (with the help of the health concierge) will locate a specialist. If needed, a smart phone can be used to have a video conference with a doctor. M.D.hotline is ideal for students who are away from home for the first time.
