

Charlotte Tree Removal Firm Founded By Army Veterans

January 23, 2017

January 23, 2017 - PRESSADVANTAGE -

Veteran Residential offers complete tree service and fence installations. The tree removal firm was founded by brothers who are Army Veterans and who are experienced in tree care.

Charlotte NC: Veteran Residential Works and Evan Selman are pleased to announce that they are a veteran-owned and operated Charlotte tree removal firm. Two United States Army veteran brothers founded the company. They offer complete tree service and fence installation services in the Charlotte NC area. The veterans each have experienced several tours overseas. The company founders are not only military veterans, but are veterans in the services and experience which they provide to home and business owners in the locale.

Evan Selman, speaking to an interviewer explained, "We employ our years of knowledge and experience with tree service and fencing throughout the Charlotte area at the most affordable rates as possible. We appreciate the support of residents of the Charlotte area and surrounding communities. We are grateful for the support of America's Veterans and current service members. As owner, I interact directly with every aspect of tree service and with every customer."

The team has the knowledge and experience to complete tree removal projects. Tree removal is required when there is extensive root decay or damage, damaged or handling limbs which are a safety hazard, trees which are a threat to homes, driveways, buildings or wires, or trees which may interfere with the health of other surrounding organisms.

The company offers competitive pricing for all of its services. The goal is to provide lower cost tree service than competitors without sacrificing quality and customer satisfaction. The professionals at the firm are fully insured. Customers have access to proof of liability which is presented by the insurance carrier. The team at VRW considers liability insurance not as an option, but as a requirement.

Each of the company's employees are experienced in the tree service industry. They are trained and

experienced with the correct techniques in tree removal and tree trimming. Their work is performed in the safest manner possible.
