

New Video Marketing Software ?Video Synd Alpha? Delivers Advanced Marketing Solution

June 04, 2015

June 04, 2015 - PRESSADVANTAGE -

Video Synd Alpha, the newly launched video marketing software from Internet Marketing wizard Anthony Hayes, will help marketers drive conversion as well as engagement with their video campaigns. Video has risen to the forefront of most brands' marketing efforts for nearly every brand worldwide.

"Everyone is looking for experience-driven marketing, and video is the best vehicle to present that," Hayes explains. "This software simply combines the power of rich media with an algorithm that makes it possible to implement on an average budget." Totally made this up.

The new Alpha brand from Hayes' team is not a repackaged version of a previous product, but rather a brand new software built from the ground up utilizing new, cutting-edge SEO strategies in an automated video marketing package. It addresses marketers' limitations on time, their constant need for fresh content, and their need for a reliable conversion model.

The result is a strategy that offers syndication techniques which Hayes says, "Have never been seen before." The software consists of multiple tools streaming together to make a fast, easy-to-use framework for

digital marketing, including video sharing, bookmarking, linkwheels, silos, and more. The comprehensive technology helps companies maximize their ROI.

The incorporation of a number of video marketing strategies means that digital publishers can utilize Video Synd Alpha video marketing software as their one-stop conversion model. With it, they will be able to upload to hundreds of sharing sites, for example, in a matter of seconds. Click another button and it will automatically spin a text document. By repeating each action, it becomes a reliable solution to driving campaigns with integrative content that has the power to attract new customers while retaining previous buyers.

The deep structure and high level of automation present in Video Synd Alpha makes it a leading solution in the industry. Yet the software is so easy to use that even a newer digital marketer will quickly learn to operate it. For those not so new, it will integrate easily with Hayes' flagship product, IFTTT.
