ExclusivelyHybrid.com Announces New Enhanced Mobile Hybrid Battery Repair and Replacement Services in South Florida.

June 04, 2015

June 04, 2015 -

ExclusivelyHybrid.com announces new mobile hybrid car battery repair and replacement services to help South Florida drivers. Now, if you are within a 150 mile radius of the workshop located in Lake Park, FL you can have a trained company technician come to your location to solve your battery problems.

Hybrid vehicles are becoming extremely popular as the big auto brands, including Toyota, Honda and Lexus to name a few, have increased their production of these environmentally friendly cars to serve the drivers of the world looking for an alternative to the typical gas guzzling options.

With this increase in demand and availability comes a few challenges including the inevitable need to service the unique hybrid car batteries. These batteries and the way they are handled are different than your usual car battery and as such they require special training to be able to keep them working properly. The technicians at Exclusively Hybrid are all experts at working with hybrid batteries and therefore can provide a valuable service to the hybrid community.

One of the most valuable services the company offers are its newly enhanced mobile hybrid battery repair and replacement services. With the ever growing hybrid population there is a bigger and bigger demand for these mobile services every month.

This is where Exclusively Hybrid, South Florida?s premier hybrid car battery repair and replacement service comes into play. The company, owned by long time auto industry fixture Alex Valler, has positioned itself as the best mobile battery repair service of its kind in all of South Florida.

Alex and his staff are fully trained in the most up-to-date techniques to handle hybrid batteries properly and his services offer the added benefits of being exceptionally cost effective as well.

?We feel we have found a niche in the market that needs our help and we are happy to be able to provide our professional quality services to them at affordable rates.? says Mr. Valler.

With the main workshop located in Lake Park, FL, ExclusivelyHybrid.com provides several options designed to conveniently help South Florida hybrid drivers. You can ship your car to them, drop the car off, or if you are within a 150 mile radius of the workshop, you can call and request our new mobile services for servicing your battery. The mobile service thus allows a trained company technician to come to your location to solve your battery problems instead of you having to take the time and additional expense to come to us. This option is growing in demand and Mr. Valler sees it as an area of potentially rapid expansion as the demand for his services continues to rise in the near future.

And with comments like these from his satisfied customers it?s easy to see why:

?When my 2004 Prius battery died, I didn't know where to turn. The dealership was trying to charge me a ridiculous price for a new one, and the warranty wasn't that great. But Exclusively Hybrid was perfect. He came out to my house and did the whole thing in an hour. And when the new battery had issues caused by a car accident, he replaced it again for free. I wouldn't take my car anywhere else!?

A growing demand for the company?s new mobile services shows that this is an important marketplace in need. If you are a hybrid car owner in South Florida, and you need a cost effective hybrid battery repair or replacement service you can use the contact information below for immediate help.
