

Grampstr's Pride Publishes YouTube Video On Renew

February 09, 2017

February 09, 2017 -
Elizabethtown, PA company Grampstr's Pride is known the world over for its eco-friendly, biodegradable line of boat and RV cleaning products. One of the company's flagship products is Renew, which is used to remove rust and stains from fiberglass and stainless steel surfaces. In fact, the product has proven to be so popular that Grampstr's Pride has decided to publish a YouTube video about it, explaining how it works and how to use it. The video can be accessed at https://youtu.be/hhjjJTsMvHQ.

"Our Renew product is hugely popular, and it is easy to see why," says a representative from Grampstr's Pride, Joe Chaudoin. "It does everything you want it to do in terms of cleaning, while at the same time making sure that you do not damage the environment. Our YouTube video shows people how to use it in the best way possible, so that they get the most out of the product."

Grampstr's Pride had a number of goals in mind when they set up and developed their products. First, they wanted to make sure their products did not have a negative environmental impact. Second, they wanted to create something that actually works. Lastly, they only wanted to market products that are easy to use as well. They have achieved this perfectly with the Renew product. "Just spray on and allow to set for a few minutes, then wash off," explains Joe Chaudoin. "For more serious stains, a light scrubbing with a light-duty sponge may be necessary. That really is how easy it is."

The company is currently engaged in an aggressive online marketing campaign to make its products more accessible. Hence, besides offering cleaning products through the company website at http://www.grampstrspride.com/products/renew-32-oz-fiberglass-stainless-steel-stain-remover, the company has also started an Amazon store front. Additionally, they have made the overall ordering process easier for customers. Adding a YouTube channel is the latest element in their efforts to become more digital and thereby accessible to the modern world.

Those interested in Renew or any of the other products developed by Grampstr's Pride are encouraged to visit their website, look at their YouTube channel, or browse through their Amazon store.
