

Highly Regarded Latex Free Beauty Blender By Lovage Now Available On Amazon For Limited Time

June 13, 2015

June 13, 2015 - PRESSADVANTAGE -

Lovage, a business focusing on health and beauty products, has launched their highly anticipated latex free beauty blender on Amazon. The product is a 100% latex free foundation sponge that help to apply makeup effortlessly and with ease. As the latest product from Lovage, a company well known for its ethical, green, high quality products, it is believed the blender will fly off the shelves.

"Our teardrop shaped sponge is possibly our best product yet", says Heidi Bi, Founder and Creative Director of Lovage. "As always, it is completely eco friendly, as this is something Lovage believes in 100%. The blender is designed to help people put their makeup on effortlessly, resulting in a beautiful finish."

Lovage is known for its commitment to being "green" with all their products. All ingredients are 100% natural and pure. This means people can use the blender without having to worry about potentially damaging the environment. Furthermore, it means that the blender can be used on sensitive skin as well, creating a flawless complexion. Best of all, Lovage guarantees that the product is suitable for vegans, as it is completely natural. Finally, it is light weight and very easy to clean.

Using the blender is very easy. It can be used to create highlights or contours simply by dabbing or stippling the blender on the skin. This helps to create beautiful shading effects, helping to accentuate all the most beautiful facial features. The tip of the blender can also be used as an eraser, if any mistakes are made during application of makeup, or if someone were to apply too much makeup.

"One of the things we really love about this blender, besides the fact that it is sustainably sourced, eco-friendly and cruelty free, is that it is such a versatile product", adds Heidi. When you buy Lovage beauty blender from Amazon, you effectively get a full makeup tool. Indeed, it can even be used to apply SPF in the exact same way as what people apply foundation. Plus, it means people are really fully protected from the harmless rays of the sun, as it allows for such a flawless coverage."

Lovage recommends people purchase a separate blender if they want to use it to apply a fake tan. The device is designed in such a way that it will not cause dark patches, blotches or streaks on the face. Indeed, the blender is far superior to tanning mits or wipes and certainly more superior to using bare hands.

To promote their product to new customers, Lovage has also released a number of special offers. Firstly, by entering code PKWMO5ST at checkout, those who purchase three blenders will receive the third one at a 50% discount. All orders currently have 20% off their original price as well. Finally, Lovage is so sure of the quality of their product that they offer a full 30 day money back guarantee. This means that the product can be purchased completely free from risks. Lovage expects demand for the blender will be very high.
