

Wool Dryer Balls Healthy Natural Laundry Softeners Premiers On Amazon

June 16, 2015

June 16, 2015 - PRESSADVANTAGE -

Ephraim Mettabel Enterprise, a household supply business in Portland, OR, has just released their natural, healthy and safe wool dryer balls on Amazon. Two sets are available for purchase and both are available at an introductory discount. The set of three XL dryer balls are now available for \$12.99, a saving of \$5. The set of six XL dryer balls cost just \$18.99, a saving of \$17. It is hoped that this introductory discount will allow more people to enjoy the benefits of this product.

"A lot of people don't realize that the gorgeous, just out of the dryer smell that fresh laundry has actually comes at a cost", says Hanny Paula from Ephraim Mettabel Enterprise. "Most fabric softeners, whether they are liquid, dryer sheets, plastic or rubber dryer balls, are filled with toxic chemicals. These chemicals are then released in the dryer, contaminating not just the environment, but the body as well. Our wool dryer balls contain none of these harmful products yet achieve the same, if not better results, than any of the chemical alternatives."

The Allergy and Environmental Health Association has stated that dryer sheet fabric and liquid softeners are "the most toxic product produced for daily household use". Indeed, a quick inspection of many of the most popular fabric softeners reveal list upon list of neurotoxins and other substances that harm the nervous system and the brain. Other toxins that are damaging to the human body and the environment as a whole are also contained in them.

Many people believe that the actual amount of toxins they are exposed to as a result of fabric softeners is so small that it is actually insignificant. However, new studies are now showing that even very small amounts of these toxic substances can have a very serious and significant health impact. Furthermore, in many cases, the ingredient lists on these products are not entirely truthful. Nu Sheep wants to change this by giving people something that is natural and completely eco-friendly. The many reviews they have received since first releasing their product attest to this.

"This product is great!", says Jaylee973. "This will save me so much money not having to buy fabric softener.

Fabric softeners can have harsh chemicals that can break down your clothes, but these still soften and reduce cling. My shirts come out wrinkle free and airy. I would recommend these to anyone trying to save some money."

The dryer balls offered by Ephraim Mettabel Enterprise are made of 100% New Zealand sheep wool. They help to reduce drying time by around 25%, thereby also cutting on energy consumption. Each dryer ball lasts for as much as 1000 loads, meaning they offer fantastic value for money as well.
