Free Estimates On Vinyl Siding Being Offered By In Demand Industry Veteran Charles T Jones For Shawnee to Greater Oklahoma City And Surrounding Areas

June 12, 2015

June 12, 2015 -
Charles T Jones, an expert in vinyl siding, seamless gutters and window replacement, has announced that he is offering free estimates to all clients who live in Shawnee or in the greater Oklahoma City and surrounding areas. He stated that once clients witness how he operates while giving a free estimate on any work needed for their home, they will realize the quality of work he's able to produce for them.

According to the latest statistics, vinyl siding is still the most popular form of exterior cladding in the United States. The biggest reason for this is because this type of material is very reliable and durable compared to their alternatives. A few examples of why it is so popular are as follows:

Vinyl siding plays a crucial role in keeping a home protected from extreme weathers, regardless of whether it is a sizzling summer or subzero winter. Because they don't absorb any water, there is no need to worry about rot or decay, compared to their fiber based alternatives. Vinyl siding also tends to provide better insulation, thus making this material more energy efficient. However, it is still important to get the right type of vinyl siding, and to use the right company to install it properly.

Charles lives in Shawnee and has been doing vinyl siding for close to 18 years, and during this time he has helped many clients improve the overall look of their homes. He said that while he might not be the cheapest in town, his clients will appreciate the high quality work, and materials he uses. He made the following statement:

"Some companies will offer cheap prices just to win as many clients as they can. Unfortunately, these clients usually come out frustrated. They then come to me to fix up the mess of the company they were using before. Homes are not cheap. I want my work to respect that and understanding that when I'm replacing their windows, installing seamless gutters or vinyl siding. That is what makes my clients happy, because we use only the best materials. Please even if you choose another Installer, remember that you get what you pay for,

please spend extra to get better material! (And make sure they actually use the money on better material!)"

Charles said that seamless gutters are also becoming extremely popular in the United States, and adds that they are very good reasons why. The first reason is because they are watertight. Unlike the older style gutters, which had a tendency to leak water from the joints at the seams, seamless gutters don't have this problem, regardless of how many joints, deviations or corners there are. The second reason is because they just look aesthetically better, and this in turn increases the overall value of the home.

He added that as long as his clients live anywhere in Shawnee and in the greater Oklahoma City and surrounding areas, he will be able to give them a free quote and do the work if they're happy to move forward.

For those who would like to get a free quote from Charles T Jones or find out more about the type of work he does, they are encouraged to give him a call at their convenience. He will be more than happy to discuss the clients' project and set up a time when they can meet.
