February 21, 2017 - PRESSADVANTAGE -

Hazelwood-based dental center offers alternatives to ill-fitting dentures or bridges. The professionals discuss the facts about dental implants.

Hazelwood MO: LifeSmile Dental Care, a Kirkwood dental implant dentist, is pleased to announce that they have state-of-the-art solutions for a wide range of dental problems. For patients who have dentures or bridges, there can be a number of inconvenient features. The dental appliances can fall out of the mouth, or slip during conversation, causing embarrassment and self-consciousness. The dental team at LifeSmile suggests that those who are troubled by dentures should check out the features of dental implants.

For patients in needs of the highest quality restorative dentistry Kirkwood dental professionals are able to respond with knowledge, experience and equipment that is the best available. Dental implants are one of the top options for patients who need tooth replacements. The results of implants are superior and very natural looking. Implants are stable, permanent and durable, similar to the natural teeth. Implants allow for eating and smiling with confidence, since they don't slip or cause embarrassment in public.

For those who need only a single tooth replaced, mini implants are a good option. Implants can also be suitable for patients with traditional dentures who require more support to aid in speech and to prevent slipping. The implants are a lasting solution requiring only slight care to maintain, unlike dentures and bridges which require replacement about every ten years. The implant consists of neutral metal which bonds with the jawbone and offers a stronger connection over time.

In addition to providing dental implants the profession can provide other dental practices and techniques. They ensure that the clean teeth Hazelwood patients enjoy are done efficiently and effectively with no pain or discomfort. Everyone from youngsters to senior citizens benefits from the practice of good oral hygiene. The dental professionals can teach youngsters about proper cleaning habits which will stay with them throughout the entire lifetime.
