

RKC Construction Opens Third Location

February 28, 2017

February 28, 2017 - PRESSADVANTAGE -

RKC Construction now offers a third location in San Diego. The inventory includes patio covers and sun-rooms.

San Diego CA: RKC Construction and Rick Crawford are pleased to announce that they have opened a third location in San Diego, at 6532 E Lake Drive. The new location offers patio covers and sun-rooms to area homeowners. Previously, store showrooms were opened at 11649 Riverside Dr #1347 in Lakeside and 9923 Paseo Montalban #B, San Diego. The locally owned and operated company in San Diego focuses on improving comfort for outdoor living opportunities in the area.

Speaking in a recent interview, Rick Crawford explained, "Our newest location helps us to make it more convenient for area customers who want to make patios and decks more comfortable. We partner with local governments through Hero Financing to make energy efficiency upgrades more affordable for homeowners. Hero has up to 20-year terms and 15% of the home's value and low, fixed rates."

He continues, "RKC Construction takes pride in serving the community. We are a locally owned company providing quality service to home and business owners in the San Diego area. We have built a reputation of installing the highest quality custom patio covers in San Diego. At RKC Construction, we do all of our own quality work and we pride ourselves on our expert installations. We prove that we care about each individual by meeting their specific needs."

The business is BBB-accredited with an A+ rating. Prospective customers can also check out the Angies List details for further information. The high quality patio covers are intended to shield homeowners and guests from the rays of the sun in order to improve the enjoyment of outdoor living spaces. A patio cover is an affordable way to improve the market value, as well as the aesthetic appearance of the home. The cover also helps to lengthen the life of the patio furniture, structure siding, and even furniture and window treatments that would otherwise be damaged by the sun's rays.
