

SoCal Electrical Opens New Orange County Location

February 28, 2017

February 28, 2017 - PRESSADVANTAGE -

Bellflower-based SoCal Electrical offers services from their new Orange County location. The firm responds to customers throughout the Irvine and Newport Beach area.

Bellflower CA: SoCal Electrical and Steve Arreola are pleased to announce the launch of their new location in Orange County. The new address serves customers in Irvine and Newport Beach. The professional electricians at the firm are proud to offer custom electrical work. The technicians are skilled at performing quality electrical installations, generator installations, and electrical repairs. The work is done in a manner to protect the safety of the customers and the electricians.

The company is insured and bonded to ensure peace of mind while completing house rewiring, electrical panel upgrades and replacements and fuse box replacements. The technicians concentrate on quality installations and satisfied customers. They provide safety, quality workmanship and customer relations. The general electricians are certified under state laws and regulations and carry a diversity of experience in various types of electrical work. All electricians have been background checked and undergo drug testing to protect the customer.

A spokesperson for the company explained, "We offer emergency services for customers who need a prompt response, irrespective of the time of day. We know that electrical issues don't necessarily keep business hours. When there is a problem with any part of electrical products or systems, the responding professional has the knowledge and experience to identify the problem and begin implementation of the solution quickly.

The business is a veteran organization which offers prompt service and completion, as well as quality craftsmanship. In addition to two million general liability coverage and a fifteen thousand dollar contractor bond, the professionals are certified in arc flash and electrical hazard. They have the knowledge and training to complete the work in a professional manner, and to maintain their knowledge to keep up with changing technology and procedures. The new location of the business allows for a wider service area to be included in the business coverage.
