

Bright Metals Recognized As A Leading Manufacturer of Non-Ferrous, Metal Ingots and Alloys

March 01, 2017

March 01, 2017 - PRESSADVANTAGE -

Bright Metals manufactures and supplies metals including bronze, brass, metal blocks, copper alloys and gunmetal ingots. The product line comes in a variety of forms and metals.

Jaipur IND: Bright Metals (India) Pvt. Ltd. and Ashish Porwal are pleased to announce that they have been operating for more than five decades. The third generation of the founders are now running the business. The firm is a pioneer in the processing of non-ferrous metals. The firm manufactures and supplies metals such as bronze ingots and brass ingots. Also in the product line are a variety of non-ferrous metal alloys.

The leading representative of the brass industry in India provides metal blocks, copper alloys, gun metal ingots and other products with exceptional material quality and unfaltering commitment towards development. The technicians have an in-depth understanding of the various needs of customers and the innovation and cutting edge technology. As a top example of the non-ferrous metal industry in India, the company delivers successfully and has become a name of great repute and faith.

In a recent interview, the spokesperson for the company explained, "Our extensive range of copper based alloys and excellent quality products such as Brass Strips, Coil, Continuous Cast Ingots, Traditional Ingots and the best jewellery alloys have an outstanding record in diverse industries and applications. We work with our customers in identifying the appropriate alloy for their every need as well as the requirement and our top grade product quality and customer support ensure a satisfied and delighted customer."

"We hold an immense experience of manufacturing aluminium brass ingots. We are one of the largest producers of these ingots in the Indian sub-continent. As a leading Ingot manufacturer company in India, we strive to offer quality products that are durable, distinctive and dynamic."

The three generations of knowledge and experience are some of the factors that have led the firm to success. The manufacturing facilities are spread over an area of more than 1,00,000 square feet, providing economies of scale and thus competitive prices.
