

CyberMetro.com Releases USB Portable Battery Power Bank Phone Charger In Time For Father's Day

June 17, 2015

June 17, 2015 - PRESSADVANTAGE -

BatteryMetro Div. of CyberMetro.com, Inc., a business in San Francisco, CA, have launched their external battery pack, just in time for Father's Day. The external pack doubles as a flashlight at the same time, making it the perfect gift for the man who loves the outdoors and wants to have full functionality of his phone, as well as having light to see the way. It is a high quality, premium device and Battery Metro expects it will be a highly popular gift, so customers are encouraged to get theirs quickly.

"Our external battery is a battery with a difference", says John Bold from Battery Metro. "This is not some flimsy device that can be purchased on every street corner and effectively doesn't last. Rather, it is a sturdy and durable charger that has an integrated flashlight as well. As such, it is a two in one device that is perfect for people who like the outdoors or who, for whatever reason, need to have power on their phone at all times."

The external battery pack is a 3000mAh power bank charger and can be found here: <http://www.amazon.com/Best-Camping-Hiking-Power-Flashlight/dp/B00LV9EFUK> The flashlight is bright and powerful, using a LED with high intensity. Additionally, it has exclusive, trademarked Turbo Charger technology, which means a smartphone can easily, quickly and, most of all, safely be charged. Not only can it charge smartphones, however, it can also be used on a number of other electronic portable devices. Essentially, it is designed to give the ultimate battery power in the palm of someone's hand.

While it has only been released for a short period of time, there have already been some highly positive reviews. "I love camping and hunting, getting back into touch with nature", says Paul Young. "The one thing I miss when I'm there, however, is the ability to communicate with others and to access the internet. I use my smartphone to find out information about foraging, for instance, so it is vital that I am able to access it at all times. Thanks to the BatteryMetro TurboCharger, I am always sure that my phone is charged, plus I have a nice bright light to shine my way. Perfect."

Indeed, this review emulates all that is good about this product. BatteryMetro is also keen to emphasize that it

is a truly premium product, as it is built using high quality materials and technology. Furthermore, they have worked very hard on the visual design of the product. It is lipstick shaped, which means it is very small and easy to take along on a camping trip or other expedition. The battery itself can recharge up to 500 times before it runs out, which is further testament to its superior quality.
