

Stainless Steel Cuticle Nipper 2 Launched On Amazon

March 23, 2017

March 23, 2017 - PRESSADVANTAGE -

Pasadena, California based company, SF Group, has recently launched a new product onto the Amazon marketplace. The product's Stainless Steel Cuticle Nipper is currently available through the marketplace.

Vincent Nell with SF Group says, "This cuticle nipper has a fancy rubber grip handle, and it is made with adherent padding to keep the fingers steady. It also can be easily removed and cleaned."

The product, which can be seen at <http://amzn.to/2mISegV>, is constructed with high-quality stainless steel material, the best alloy in the market, according to Vincent Nell. He says this product has no oxidation, and won't cause clumsy breaking or dull edges on cuticles.

"The handle of the cuticle trimmer is attached to an adherent purple rubber grip handle to make the procedure as safe and as comfortable as possible," says Vincent Nell. "No slippery fingers and silly accidents, the customer's fingers will stay still and they will be able to finish the removal of their cuticles even faster."

SF Group designed their Stainless Steel Cuticle Nipper to be easy to clean, the rubber handle can be removed for hygienization, so no need to wash all the cuticle trimmer and damage the sharp edges. The rubber can be rinsed with water and soap and that will make it always clean and ready to use.

The company states that their new product can help removing cuticles with precision, all quick and neat. More can be seen on the company's Amazon seller's page.
