Iphone Holder For Running Receives Rave Reviews On Amazon

June 10, 2015

June 10, 2015 - PRESSADVANTAGE -

The MINE LLC company announces a recent development with it's armband for the iPhone 6 which has been receiving stellar reviews on Amazon, and is outpacing their competitors due to this. In fact, it is now listed as a five star item. The iPhone 6 being the latest iPhone model, has people looking for various accessories to improve the usage of their device, and it seems that the MiNE armband is just what they were looking for.

"So I must say I really enjoyed this armband", says one Busy Mom. "I'm a mother of 2 crazy adorable boys and between cleaning, and running after kids I not only lose my mind but I lose my cell phone quite often as well. lol This band is comfortable and it holds the phone secure while I'm cleaning and listening to music! This accessory has become a go to when I'm home and even when I take the kids to the park!"

The iPhone 6 armband is perfect for high action sports, as it securely keeps the iPhone in place on the wrist. It is a fully adjustable band that allows for hands free action. The band is completely black, which means it won't clash with any outfit either. It is a simple armband, but it does everything that is needed, which is what matters.

"This is a fantastic armband", says an Avid Runner. "My husband and I are both avid runners, and we run at separate times, and we share our armband. There are two size options, one for smaller arm, and another notch for a larger arm to fit my husband. What we love the most about the band, is that you don't have to remove your case in order to use the band. Armbands that we have used in the past, we had to remove our case, which was a hassle. Wonderful product, and great company."

The sport armband is made of a comfortable neoprene material that is comfortable and very lightweight. It comes with a see through screen cover, so that the phone itself is protected from sweat, but also from the elements. Hence, runners for instance, who frequently run in the rain, don't have to worry about their device getting destroyed. The armband closes with Velcro, which means it can fit anybody, regardless of their wrists size. As a bonus feature, it comes with key holder and it also has a reflective strip, which allows people to run safely in the dark. All this combined makes it the best running armband.

MiNE LLC is a company that prides itself on the quality and affordability of their products. As such, and to celebrate the various positive reviews they have received, they currently offer it on Amazon with a 55% discount. Furthermore, it is fully backed with a seven day 100% money back guarantee for those who aren't completely satisfied.
