

Car Battery Fitting At Home Now Being Offered By Car Battery Assist

June 11, 2015

June 11, 2015 - PRESSADVANTAGE -

Car Battery Assist, a business in Watford, Herts, United Kingdom is proud to announce their brand new 24hr car battery fitting at home service. This service is designed to take the difficulty out of having a new battery fitted, while having the peace of mind of quality repairs. It is hoped that this will encourage more people in the Hertfordshire area to have their batteries fixed when needed.

"We have always been shocked at the number of garages that offer battery repair services, but expect the vehicle to come to them," says Ray Barnes from Car Battery Assist. "Exactly how are people supposed to bring their car to a garage if their battery is breaking, is why we have started offering car battery fitting at home services, as well as a range of other services."

The home fitting service means that a mechanic from the company comes to the customer. Every battery that is fitted comes with a full three year guarantee, thereby making sure of the quality of the part. Furthermore, they take the old battery away, something that is very important due to environmental concerns.

Another popular service offered by Car Battery Assist is the car jump start service. Sometimes, a battery

doesn't need replacing as it has simply been allowed to run flat, for instance if someone leaves their vehicle lights on. Not everybody has jump start cables however, or, if they do, they may not know how to use them or they may not have a second vehicle available with which to jump start the battery.

"With this service, we come and test the battery first", adds Ray Barnes. "If we find that it is safe to jump, we will simply do that and get the car on the road again. As soon as the car is running, we will perform a second test to make sure the battery isn't actually broken. The results are shared with the customer and if it is found that the battery does need replacing, it may be done right there on the spot."

The service has been running for some time now and has been positively reviewed by their many customers. "Thank you so much for saving my day", says Sara Cordell. "Car battery died at home at 8.30 at night and Ray was there so quickly, fitted a new one and so reasonable. Many thanks and I will be telling my friends."

Having a flat battery often feels like a complete disaster. However, thanks to the new Car Battery Assist service, it no longer has to be. Their service is prompt and of high quality and, perhaps most importantly, of extremely good value. They truly take the hassle out of battery problem.
