

# Franklin Carpet Cleaning Expands Service Area

*March 20, 2017*

March 20, 2017 - PRESSADVANTAGE -

Franklin-based carpet cleaning offers an expanded service area which includes all of Middle Tennessee and the Nashville area. The firm provides green, eco-friendly cleaning for all aspects of homes.

Franklin TN: Franklin Carpet Cleaning and John Cook are pleased to announce that they offer professional and high quality cleaning services for the entire Williamson County area. The cleaning services are environmentally friendly and include carpet cleaning, rugs, upholstery, automobile carpets and seats, and more. The professional services include stain removal and protection and repair and stretching services for carpets and rugs. Reliable service is guaranteed, with professional and uncompromising quality. The service is affordable with competitive prices.

Speaking in a recent interview, John Cook explained, "Our professional staff is trained and experienced using advanced equipment for safe and effective cleaning. Our goal is satisfied clients who will recommend us to their friends and families. Customer service is important to us and we will treat your home as you would treat it. We use environmentally friendly, pet- and child-safe cleaning products. We want to protect the environment for our children's future and yours too."

The company uses cutting-edge methods in cleaning. The current technology utilizes extraction of hot water, which proves to be the most effective and safest. The method involves the forcing of 120-degree F pressurized water into the carpet fibers. They are then agitated to loosen soils, stains and germs, then extracting them with powerful cleaning equipment.

The green products include only cleaners which are free of soap. This type of cleaner is suitable for all kinds of carpet, and does not leave them stiff, flat or spongy. Only the safest and need specific cleaning equipment is utilized in the course of the project. FCC goes over the carpet twice to ensure that any stains, dirt, salts and minerals, mildew and mold or cleaners are removed. Then the carpets are dried thoroughly within two hours, in order to remove any saturation risk or insulation damage.

Franklin Carpet Cleaning offers several other highly effective options. These include specific stain, including

pet stains and odor treatment, as well as fiber protection treatments.
