

Omni Heating and Air Expands Service Area

March 20, 2017

March 20, 2017 - PRESSADVANTAGE -

Lake Elsinore-based heating & air pros operate in Riverside and San Bernardino County, California. The professionals are highly trained in central heating and cooling systems installation.

Lake Elsinore CA: Heating & Air Pros and Richard Rizk are pleased to announce that they have an expanded service area which includes Sonora and Riverside. The professional technicians provide HVAC, air conditioning and heating repairs and installation through the San Bernardino Valley. Omni Heating and Air tackles system repairs regardless of how large or how small the issue happens to be. In addition to performing the actual work, the pros take the time to answer the client's questions and explain the methodology.

The professionals at the Riverside firm (<http://heatingairpros.com/riverside/>) understand how much their customers rely on the heating and cooling systems. They take a thorough approach to handling each repair job. Rather than letting minor problems turn into complete system failures, it is better to rely on the professionals to identify the problem and to provide a solution.

With the arrival of spring and summer seasons, the Sonora professional team (<http://heatingairpros.com/sonora/>) has the knowledge and experience to ensure that the customer's AC system is working in the way it should. Whether the system is slowing down or has stopped functioning completely, the technicians arrive on the scene with the right tools and knowledge to work up a viable solution. They pride themselves on the provision of air conditioning repair services which are effective and affordable. Air conditioning repair work for a single unit or for an entire building is provided.

According to a representative at Omni, "We provide the highest level of quality in all of our installation projects and all jobs are performed by highly experienced and trustworthy installers. We aim to keep our prices reasonable and affordable and we offer a variety of systems to suit the needs and budget. Installation of a quality system represents a long-term investment in the value of the home or business."
