

Raleigh Roof Repair Firm Celebrates Six Years In Business

March 27, 2017

March 27, 2017 - PRESSADVANTAGE -

A&H Forensic Roofing offers their skills and experience to customers in the Raleigh NC area. The family owned parent company, A&H Contracting Group was established in 2011.

Raleigh NC: A&H Forensic Roofing and David M. Piterksi are pleased to announce that they have reached the milestone of six years in the Raleigh roof repair industry. The parent company of the roofing firm was established in 2011 and are committed to the philosophy of excellent service. The firm holds general liability, workman's compensation insurance and automobile commercial insurance to ensure peace-of-mind for employees, as well as customers. In addition to insurance coverage, the roofing firm holds licenses and certifications in North Carolina and Florida, and is licensed as a federal government contractor.

According to David Piterksi, speaking for the company, "In our years of working in the North Carolina roofing industry, we have noted that it was common to witness poor customer service from other contractors. In our family owned and operated business, we determined to begin a business centered around small business values and high quality results. We provide residential and commercial roof repairs, restorations, replacements, as well as preventative maintenance programs for all types of commercial properties."

The company has extensive knowledge in roofing, but also the technical aspect of engineering. A&H provides value through functional and cutting edge services with a foundation of scientific principles. They offer solutions to roof problems, installations and projects. They deliver solutions so that each project is completed in an efficient and timely fashion.

"To Provide Excellent Service" might sound simple, but is direct and provides great value on how the team represents itself. Each customer is served with the goal of full satisfaction with the completed project. A number of educational articles and suggestions are offered on the website for the purpose of informing customers. These include "How to Recognize a Damaged Roof" and "Roof Repair vs Roof Replacement", as well as descriptions of "Types of Roofing Materials" and "Your Roof's Enemies".
