"It is a small spiral slicer perfect for occasional usage. We love it for ease of use and for being able to tuck it away until the next time we need it again. Our favorite is zucchini noodles with avocado sauce. This is perfect for whipping this up on a hectic weeknight. It has made our healthy eating even healthier. The company was friendly and it shipped quickly arriving two days after it was ordered. I would recommend this product to anyone. Happy cooking!"

This was to ensure that the product could be operated safely while you easily slice your vegetables. They added that the whole process is just like sharpening a pencil. All the customer needs to do is insert the vegetables in one end of the product, and then twist. HandyCook spiral vegetable slicer is able to make different sized strands.
