Immortalitea Releases Video Answering The Top FAQs Regarding White Mulberry Leaf

March 29, 2017

March 29, 2017 -
The Immortalitea Company in Grandville, Michigan, has released a new YouTube video that helps to clear up confusion about white mulberry leaf. The company states that the video is designed to offer answers to the top frequently asked questions about white mulberry leaf and provides insights into its benefits.

Margo Chupeido, a representative with the company says, "We wanted to help our customers to better experience the benefits of the white mulberry leaf, which is why we created the video. If you have ever had questions about this kind of tea or its benefits, I strongly suggest that you take a look at the video."

Chupeido states that white mulberry leaves have compounds which help to block sugar. She explains that while these compounds will not allow someone to eat sugar without repercussions, they can help those with a sweet tooth to enjoy a treat now and then without the guilt that is normally associated with sugar consumption.

"The problem is some people will buy white mulberry leaf and not know why they need it," Chupeido says. "Our video is going to help you to better understand how and why you should use this tea."

The Immortalitea Company has worked with the Agriculture of Ministry in Thailand for more than 10 years to train local farmers on how to grow the most potent tea leaves. The company says that their goal is to bring the purest teas possible to customers in order to offer them the most benefits from them. They harvest their white mulberry leaves multiple times throughout the year to ensure that all leaves are fresh.

Chupeido points out that when mulberry leaves are processed incorrectly, they can be toxic to ingest. She states that this and other facts about white mulberry leaves have prompted the company to produce the video to help quell confusion and to ensure that their customers know how to choose a healthy tea leaf and how to properly use their tea leaves for the most benefit. Those interested can see the new video on YouTube or visit The Immortalitea Company on their official website to learn more about their growing process and the various products that they offer.
