

Best Portable AC Releases Buyers Guide And Reviews

March 30, 2017

March 30, 2017 - PRESSADVANTAGE -

San Antonio-based Best Portable AC website and blog has posted its 2017 top picks for portable cooling equipment. Detailed reviews are available for the top ten models and brands.

San Antonio TX: Best Portable AC and William J. Thomas are pleased to announce that they have posted this year's picks of the top portable air conditioners. The best portable AC (<http://bestportableac.net/>) equipment considers many different features and inclusions in naming its picks. The comprehensive buyers' guide is combined with a list of ten top-ranked portable air conditioning units. Portable AC units are popular for those residing in smaller spaces, including small condos, rooms and apartments.

Portable units are usually smaller than traditional AC units. The size is not a good indication of the cooling efficiency. The major benefit of portable units is that they do not require installation. Nearly anyone can use the equipment without assistance. The equipment can be moved from one location to another as needed. The buyer's guide and reviews are designed to help novices select a unit appropriate for their needs and budget constraints.

Some of the features which must be considered before purchasing a unit include power requirements, environmental issues such as air flow, controls, the budget, duration of use and noise level of the unit. The descriptions in the guide include information about the BTUs or power rating, air filtration ability, noise levels, installation difficulty, power saving components, portability and the cost of maintenance.

There are various advantages of portable units, including no restrictions and effectiveness for small spaces. The units are cost effective and are able to cool and dehumidify. Some potential drawbacks to the equipment include high noise level and a tendency for water management issues. Portable units are less efficient than traditional types and have a limited range of operation.

The article lists the top options for 2017 portable AC units. These are: EdgeStar Ultra Compact; Haier; Friedrich P12B; Friedrich PH14B; Whynter ARC-14S; The Honeywell; LG LP1215GXR; Haier HPN12XCM; Honeywell HL14CESWK HL Series and EdgeStar 12,000 BTU. For each of the brands and models, the most

significant positive feature listed, including categories such as smallest; cheapest and best Eco-friendly brand.
