

Superb Chefs Announces New Release Stainless Steel Measuring Cups Conquers Chefs Frustrations.

June 24, 2015

June 24, 2015 - PRESSADVANTAGE -

Superb Chefs has released their high quality stainless steel measuring cups on Amazon. These cups are of professional grade, as well as being completely safe for use in the kitchen. It is an opportunity for everyday people to cook like a pro. Now that it is also sold on Amazon, it is believed that demand will rise very quickly.

"Too many people are still struggling with measuring cups made of BPA plastic", says George Rota from Superb Chefs. "They are, quite rightly, frustrated with the handles breaking or bending. Additionally, these types of measuring cups often tip over, spilling the contents all over the kitchen bench top. With our new stainless steel measuring cups, this is a thing of the past."

The measuring cups have been crafted from professional grade 18/8 gauge stainless steel. Additionally, the entire measuring cup is made of a single piece of stainless steel, which means the handles will never break off. The stainless steel is rust resistant, which means they can be used again and again. Additionally, the cups have properly engineered bottoms, which will prevent them from falling over.

While only having been available on Amazon for a short period of time, it is already classed as a five star

product. People comment on how these cups offer elegance, finesse and style. The satin steel interior and the highly polished mirror finish exterior means that these measuring cups often take pride of place in a kitchen. The various positive reviews that have already been left on Amazon further highlight this.

"This stainless steel measuring cup set is a chef-worthy set," says Carol LaFrantz. "There are 6 different measuring cups and each has a pouring spout. They all have clear measurement marking on the outside and also have different measurements so you can use one cup for several different items. I am impressed with the durability and quality of this set. There is some weight to them too. They all will nest so you will not take up any more room for storage than the largest cup. These are worthy of 5 stars and more. I just wanted to add, after a few days of using these, I still love them!"

The measuring cups are incredibly easy to use thanks to their pour spout and the fact that they have both standard USA and metric measuring indicators. These indicators are stamped, which means they will not rub off over time. The next smallest size is also marked on the cups, so that switching between sizes is made easy. The cups are dishwasher safe and easy to clean and store.

As an extra bonus, Superb Chefs is currently offering the steel cups with a free eBook. This gives great techniques and tips to become a veritable master chef.
