

Popular Microwave Cover is Certified BPA Free

May 12, 2017

May 12, 2017 -
Consumers the world over now look for products that are free from BPA, which is suspected to have negative effects on one's health. Monika's Marketplace, based in Sanford, FL, is proud to announce, therefore, that their popular microwave splatter guard product is a certified BPA free microwave cover. This gives people the peace of mind of not being exposed to harmful chemicals.

"People want to use products that are BPA free," says a company representative. "We knew that our product was BPA free, but to give our customers the assurance that this is truly the case, we have had it chemically tested in an independent lab. The certificate showing that our cover is 100% BPA free is now on our Amazon listing."

In virtually every Amazon microwave cover review, the fact that this product is BPA free is mentioned. "I purchased the BPA free vented microwave food cover to replace a food cover that was unsafe. It works fantastic and I like the fact that it can be vented when you're microwaving food and then the vent can be closed to keep the food hot...," says one Amazon customer.

BPA is a chemical that is found in a variety of commercial plastic products, and particularly in hygiene products and food containers. It first came onto the market in 1890, but was developed into a resilient

polycarbonate plastic during the 1950s. After that, it was added to a variety of products to make them harder and more resilient. However, it is now known that it is a harmful chemical and one that is a carcinogenic, particularly when heated up in the microwave. As a result, people actively look for BPA free products instead.

The BPA free microwave cover has been designed to be easy and safe to use. It fits standard dinner plates and avoids food splatter across the microwave. It comes with a top handle for easy removal, and can be vented to avoid steam burns. Alternatively, the vent can be left closed so that food stays warm. Being BPA free, the product is also fully dishwasher safe. While it is very easy to clean by hand, it can also be placed on the top shelf of a dishwasher.
