

Colore Art Encourages Everyone To Be Creative With Chalk Board Markers

June 18, 2015

June 18, 2015 -

Rowland Heights, CA based company, Colore Art, has announced that their chalk board markers help encourage and foster creativity in children and adults alike. The increasingly popular tools can be used to create drawings, labels, decorations, and more by writing across non porous materials such as glass, or smooth chalkboard surfaces. The result is a neat, smudge free design, which stands out in an array of bright colors and can be wiped clean to decorate again and again. The company has said the following regarding this product:

"Colore Liquid Chalk Pens Set are perfect for decorations on Christmas, New Year's Eve, 4th of July, Labor Day, Birthday or Wedding Parties, Halloween Night, Mother's & Father's Day Celebration, Easter Eggs & St Patrick's Day and any of your private events. The possibilities are endless."

These chalk markers are currently available through the company's Amazon.com sales channel, and are selling for $18.97. The purchase includes a set of 8 vibrantly colored markers, which provide a dual tip to reverse between bullet and chisel nibs for the best quality of writing. Those who purchase the pens reportedly receive a pen holder and free electronic copy of a PDF booklet entitled, All You Need To Know About Chalk

Markers. The company has stated that they include this in an effort to allow their customers to use the products to the best of its ability and extend the lifespan of the pens.

Colore brand sells their chalk board markers in purple, white, blue, orange, yellow, green, red, and pink, and have made it clear that this assortment of bright colors is meant to further encourage and inspire creativity in those of all ages. They have had a number of positive reviews on the product thus far, which can be seen on their Amazon sales page. They also invite those who are using the pens for the first time to leave their own feedback and let the team know what they liked or disliked about the markers. One such customer, Myrissa Bass, left her experience with the product, saying the following:

"My creative children have decided that everything they touch needs to be written on with these chalk markers. So easy to use and washes off quickly when you are finished. Just shake the marker and gently push down the tip for the chalk to come out. Writes smooth without any skips in the color."

Although the company promotes their sales through Amazon.com, they also invite interested consumers to visit them at their website. This gives a closer look at the chalk board markers and other products that the company is passionate about. Further customer testimonials can be seen here, and Colore Art also writes an informative blog to keep their loyal clients up to date on inspiring new tips, tricks, and decorating ideas which their products can be used in.

The markers have been reported to work extremely well for labels in the kitchen, stores, shops, restaurants, and other locations where product names and ingredients might require name tags, but the company has suggested that they also make wonderful accents for weddings, birthdays, and other celebrations due to their unique and whimsical look.
