

Five J Enterprises Latest Herb Grinders Makes Its Debut On Amazon

June 15, 2015

June 15, 2015 - PRESSADVANTAGE -

Jacob Hoaglund, a spokesman for Five J Enterprises, has announced that their latest product, which is an Herb Grinder and Pollen Catcher with Scrapper, is now available on Amazon. He said that their product is made from high-grade aircraft aluminum, which will ensure that customers never have to experience chipped teeth on the Belle City Grinder (The name of their product).

The Belle City Grinder is made up of 4 pieces, and the crusher measures at 2.5 inches. The company said that customers will be very excited with this new product because of its effectiveness. They stated that a lot of thought went into the design of the Herb Grinder. For example, the product comes with a very powerful magnet to ensure that none of the herbs can escape while the customer is grinding them. The crushers are also designed to be very durable so that all types of herbs, even the tough ones, can easily be ground. One customer wrote the following review on the product,

"I really like the size of this grinder. It works really well. I have 2 other grinders and this one is definitely the best. I would highly recommend it for herbs or whatever you're grinding. I bet this thing could grind rocks into a fine sand."

The Herb Grinder is designed with two stages. In the first stage, the fine powder is sifted through a pollen catcher, which the company says is perfect for customers that like a nice granulated fine dust. The second stage sifts the flakes of the ground Herbs through the first chamber and into the second piece, which are then used for other general needs.

One of the main problems people generally find with grinders is that they never stay consistent. Reports of shown that in the first few months, the grinder will work well, but then loses its effectiveness over time. Five J Enterprises said that their products are designed with consistency in mind. They wanted to make sure that customers will still get the same results even after using the product for a year or more. To achieve this, they stated that there grinders are made from only the highest quality materials that are designed to last. Another customer wrote the following in their review of the product,

"Best Grinder ever. Very impressed by the top quality and easy function, worth every penny. I will recommend this to all my friends."

The company said that customers will be pleasantly surprised at just what can be ground with their new product. For example, it is possible to grind the majority of herbs and seeds, and even garlic. They added that they are also offering a 90 day no questions asked money back guarantee, as well as excellent customer service.

Jacob Hoaglund urges anyone that is interested in buying a high quality herb grinder and pollen catcher to check out their Amazon storefront. Here, interested parties will also be able to view reviews written by customers who have already bought the product.
