

## **Solving Equations Games & Activities Bundle From Math File Folder Games Now Available At Company's Website And [Teacherspayteachers.com](http://Teacherspayteachers.com)**

*June 16, 2015*

June 16, 2015 - PRESSADVANTAGE -

Justin Holladay, the owner of the company MathFileFolderGames.com, has announced that their latest Solving Equations Games & Activities Bundle can now be purchased from their website directly or through TeachersPayTeachers.com. He said that this product is a comprehensive downloadable/printable package that is perfect for fifth, sixth, seventh, eighth and ninth grade, and homeschooled students.

The company said that the latest bundle contains 31 games and activities that are designed to help students learn and understand the concepts of algebra. This is done by showing students how to solve algebraic equations and expressions, which is achieved by solving basic equations, two-step equations and also equations with variables on both sides.

Justin said that their 31 games and activities contain the following exciting examples: Balance the Scale, Substitution Cross-Off, Four in a Row, Equation Wipe-Out, Substitutional Spiral: One and Two-Step Equation Game and many others. He also made the following statement,

"File Folder Games are a simple way to be ready at any moment to play a math game. Storing the math games in file folders allows for easy access and easy storage. While it isn't necessary to store these games in file folders, I recommend it for its ease of use. Other storage methods might be more suited to your own situation. Above all, Math File Folder Games makes playing math games an easy option for your students and children."

The company said that besides the solving equations games, they are also including a free sample of Equation Rummy. They said that this is an excellent way to help students solve one and two step equations. Justin explained the way the game works with the following statement,

"Equation Rummy forces students to think carefully about the cards they decide to keep, since they are not only selecting the numbers which will work to yield a positive answer for a result, but also the appropriate symbol cards to give their equation meaning. Further, Equation Rummy provides an ideal way to model simple equations and acts as a perfect introduction to equation-solving for a sixth or seventh-grade class."

MathFileFolderGames.com stated that their goal behind their latest bundle, and with all other games that they sell on their website, is to create a fun and challenging environment where students are able to interact cooperatively or competitively in order to achieve a defined goal, which is usually within a specified set of circumstances. The students will also be learning and practicing math skills in the process in order to solve one and two step equations games.

They added that they are excited with their latest bundle and are confident that their math games will provide the students with an excellent environment to learn and have fun. For those who are interested in finding out more about the company's Solving Equations games and activities bundle, interested parties are encouraged to visit them directly on the website where they can find fun printable math games. Here, customers will be able to see a list of other math games that they have available and can also contact the company directly by email if they have any further questions.
