

Klippro Releases New High Quality Eyebrow Tweezers On Worlds Biggest Platform

June 16, 2015

June 16, 2015 - PRESSADVANTAGE -

Laura Manning, spokesperson for the company KlipPro, has announced that they have released a new eyebrow tweezers for 2015, which can be purchased from Amazon.com. She said that these tweezers are the latest style for 2015, and act as a 2 in 1 product, which is an eyebrow tweezer and comb.

KlipPro said that customers will be excited with the slant tip design on these eyebrow tweezers. The reason for implementing this design is to provide a more effective tweezing experience. With many of the low quality tweezers that are sold by other companies, customers are usually left frustrated when they tried to remove those hard to reach or fine unwanted hairs. The company stated that their tweezers definitely don't fall into this category. The Cute Eyebrow Tweezers with Comb can be used by men or women, and click Pro said that it is one of the preferred tweezers by professional makeup artists that rely on precision eyebrow grooming. KlipPro wrote the following,

"This 2-in-1 Tweezer with Comb is a revolutionary compact tool for eyebrow shaping. Its slant tips are perfectly aligned to grab the unwanted hair you want at an angle that is convenient to see."

The company also stated that The Cute Eyebrow Tweezers with Comb has perfectly calculated tension and angle. This helps customers to always get a good grip on the product so that they can get the best performance when tweezing their eyebrows or removing any other type of unwanted hair.

Laura said that these tweezers can also be used for other jobs, such as picking up tiny objects or even removing splinters. The tweezers also come with a lifetime guarantee. The company said that if for any reason a customer is not satisfied with their tweezers, or if they lose their effectiveness, they can simply notify them and then the company will either give them a full refund or a free replacement. One customer wrote the following review on Amazon,

"I love tweezers. They're just one of those beauty tools that are rather captivating to have. The KlipPro 2-in-1 Eyebrow Tweezer with Comb is no exception to my fascination either. These have the same general style as your typical tweezers, but this particular one has a tiny comb at the end which is ideal for combing through your eyebrows. I love this because I use tweezers on my eyebrows for shaping and keeping things 'looking nice', so having a little comb handy seriously helps keep everything together. The angle of the tweezer tip helps grab each individual eyebrow hair and is also great for getting small splinters..."

The company urges all those who are interested in their eyebrow tweezers to visit their Amazon storefront to see "what our customer says".

The tweezers come in a pink color with comb on one end. Currently, there are over 50 positive customer reviews. Laura Manning invites all interested parties to visit their storefront where they can get full details on the Cute Eyebrow Tweezers with Comb, as well as images and a video posted by a customer to show the product in action.
