

# Protiga Group Up Window Bird Feeder On Amazon

*April 03, 2017*

April 03, 2017 - PRESSADVANTAGE -

Walnut, California based company, Protiga Group, has recently launched a new product onto the Amazon marketplace. The company's Up Window Bird Feeder has become available through the marketplace. Sarah Dykes with Protiga Group says, "This feeder is great because people can watch their birds eat and rest without alarming them."

The product which can be seen at <http://amzn.to/2nBUBTs> is made of high quality acrylic material, making it durable to endure harsh rain and snow throughout the whole year with minimal maintenance. "This feeder has a rubber perch from which the birds can sit and eat comfortably - remember to attach the suction cups high on the window to avoid squirrels or other pests," Sarah Dykes adds. The feeder is lightweight enough (14.5 oz) to be attached on the window surface.

She also states that this product has drainage holes to drain water and snow for easy cleaning. The company designed the feeder to be transparent, it is a see-through window mounted bird feeder box that lets people watch birds closely from inside the house without alarming them.

Sarah Dykes adds, "No binoculars needed, people can even invite their children and have a lesson of nature together." Protiga Group provides a free e-book entitled "How to Attract and Keep Birds in Your Garden" for every purchase. More can be seen on the company's Amazon seller's page.
