

Protiga Group Launches On Facial Cleanser

April 03, 2017

April 03, 2017 - PRESSADVANTAGE -

Walnut, California based company, Protiga Group, has recently launched a new product onto the Amazon marketplace. The company's On Facial Cleanser has become available through the marketplace. Sarah Dykes with Protiga Group says, "This facial cleanser is great for exfoliating dead skin cells."

The product which can be seen at <https://www.amazon.com/dp/B01LXUZ10M> is equipped with soft silicone material that is antibacterial and non allergic. It is also waterproof, and safe to use in the bath, shower, or anywhere else. "On Facial Cleanser has 1000+ micro fingers to scrub your face with 6000 pulsations per minute and clean the entire skin," Sarah Dykes adds.

She also states that this facial cleanser has high and low sonic frequencies to remove dead skin and dirt, or massage and improve blood circulation. It practically acts as a dual skincare. Sarah Dykes adds, "This facial cleanser uses rechargeable batteries and comes with a charger plus a pouch." Its long lasting batteries and handy pouch are perfect to bring on travels.

This facial cleanser gives the greatest facial treatment, the high sonic pulse frequency will smoothen complexion, reduce fine lines, and clean dirt, oil, or makeup residues. While the low sonic pulse frequency massages the skin to improve blood flow, increase collagen production, and restoring skin's elasticity. More can be seen on the company's Amazon seller's page.
