

M1&Co Electrical Carries Level 2 Electrician Accreditation in Wollongong and Illawarra Regions

April 03, 2017

April 03, 2017 - PRESSADVANTAGE -

South Coast NSW: M1&Co ? Level 2 Electrician offers accredited services to inhabitants in the Wollongong and Illawarra regions. The experts are qualified to work on a broad range of projects from industrial, commercial and residential venues.

South Coast NSW: M1&CO - Level 2 Electrician announces that they are positioned to serve customers throughout the Illawarra and Wollongong region of Australia. The experts are qualified to work on many requirements related to industrial, commercial and residential projects. A Level 2 Accredited Service Provider ensures that all work is carried out in accordance with best practice industry standards. The professionals maintain a high standard of health and safety. The goal is to leave customers happy with the services.

A Level 2 Electrician expert works on projects such as private pole installations and replacements, lighting upgrades, disconnections and reconnections and underground service mains. The level 2 electrician in Wollongong has the knowledge to provide cross arms, metering, three phase upgrades and overhead service

mains. Additional tasks provided by the electricians include off-peak HW upgrades, mini excavation, trenching and cable and fault location. The company also offers temporary builders supplies.

In NSW, some major electrical projects can only be completed by personnel with the appropriate qualifications. Level 2 ASP electricians are authorised to work on or near Endeavour energy and Ausgrid networks, handling live wires and metering equipment.

According to a spokesperson for the company, "Our Level ASP professional contractor team strives to provide the highest standard of Level 2 electrician work for all clients. We are proud to offer some of the most professional and practised Level 2 electrical contractors in Wollongong and surrounding suburbs. We apply the highest standards in safety, efficiency, quality workmanship and customer care in line with Australian Laws and Regulations."

For new premises M1&CO provides power from either overhead or underground systems. This includes the supply and installation of all metering requirements. For existing premises, the electricians can provide any power upgrades disconnects/reconnects; relocate switchboards and/or mains; upgrade metering requirements or even just advice. All work is fully guaranteed.
