

Flo Accessories Launches New Products

April 10, 2017

April 10, 2017 - PRESSADVANTAGE -

Flo Accessories offers a range of convenient and functional beauty accessories for men and women. The company has recently launched several new products to add to their line.

Santa Barbara CA: Flo Accessories are pleased to announce that as a brand dedicated to creating easy and smart beauty accessories, they have recently launched a number of new amazing products. The inventory contains a verity of women?s and men?s beauty tools designed to help everybody achieve that effortless beauty look in a stressful everyday routine and while on the go.

In addition to a catalog of useful accessories and products, the website provides an interesting and informative blog on various beauty topics. The company bills itself as a leading global firm for effortless beauty accessories.

FLO Accessories beauty tools combine innovation, ease-of-use and fashion in order to meet the special needs of today's busy, on-the-go people. The line of products began when the founder experienced a mishap with a perfume bottle broke in a suitcase while he was traveling internationally. The market at the time didn't

offer a viable solution for transporting perfume in smaller quantities easily and safely. He designed and created a small perfume container for on-the-go purposes and the FLO Perfume Atomizer was patented in 2005.

The various products which are available meet the test of effortless beauty. Products such as the on-the-go perfume atomizer are designed for safety and convenience. Other products are able to reduce the effort involved in a beauty routine. Examples of the latter are LED tweezers, a lighted make-up mirror, make-up brushes and sponges. There are also nail tools and hair tools which are available on their official website.

The FLO blog associated with the website provides information about various topics related to on-the-go lifestyle. In addition to the blog, the website maintains an active social media presence, including Facebook, Twitter, Instagram and YouTube and Pinterest. Customer reviews are available on the website and there are also reviews which come from other blogger websites.
