

My Mini Trailer Named Most Affordable Mini Camper Trailer Manufacturer in the US

April 10, 2017

April 10, 2017 - PRESSADVANTAGE -

Fairfield-based My Mini Trailer offers prices which are as much as 70% lower than the other trailers. The company manufactures the most affordable mini camper trailer manufacturer in the United States.

Fairfield NJ: My Mini Trailer and Umit Demircan are pleased to announce that their mini camper line is priced at a point that is up to 70 percent less than the major manufacturers. Many of the big name manufacturers charge four times more than MMT pricing, making us the most affordable mini trailer camper manufacturer in the United. The trailer line from My Mini Trailer offers convenience, utility, sleek design and comfort at an affordable price.

According to company founder Umit Demircan, "I have been to many places and know what I want from my outdoors experience. Because I didn't have the budget or the intention to spend \$10k for a trailer and buy a bigger car, I decided to build my own trailer, keeping the price under \$3k. It also needed to be light and small enough to be towed by most cars. With time and effort, I was able to accomplish my goal of building a trailer for under \$3000 with all the features I wanted."

The decision of Umit led to the birth of the company where the goal and passion is to serve people who love nature, camping and outdoors, but want to have an affordable trailer which will keep them company. Thousands of people now know about the company and show their support every day.

The basic trailers begin with a price of \$2650 and there are multiple accessories and add-ons which can be ordered to customize the unit. Even the least expensive model, the Carpe Diem Mini includes color options for the aluminum skin, residential grade carpet and LED lights. Additional models are the Carpe Diem Woody and Serenity X. Essential add-ons include such items as a 3-in-one climate control system, exterior decals, spare tire, a kitchenette, roof rack and diamond plate and diamond fenders. There is also underfloor storage, an extra side door and extra window.
