

Night Light Electric Durango Expands to Serve Durango CO and Farmington NM

April 12, 2017

April 12, 2017 - PRESSADVANTAGE -

Night Light Electric Durango offers an expanded service area in Durango, Colorado and Farmington, New Mexico. The firm has been providing services in the Durango area since its launch in 2003.

Durango CO: Night Light Electric Durango and Roger Sheak, Owner/Operator are pleased to announce the expansion of the service area. The professional team now serves both Durango, Colorado and Farmington, New Mexico. The electricians in Durango have been providing top tier electrical services since their launch in 2003. Over the years, Nightlight Electric has expanded its staff size and electrical services to meet the industry's growing needs.

Clients throughout Central and Northern New Mexico are provided with the highest quality of commercial, residential and light industrial electrical installations. The dedicated team of electricians has the resources, knowledge and experience needed to provide dependable electrical solutions. Nightlight Electric Company is committed to the safety of clients and electricians alike. Safe practices help to reduce, if not eliminate the possibility of environmental harm, occupational illnesses, or electrical injuries. The team takes the time to do the work safely.

Regardless of the size of the job, work is completed safely and timely. Any size project can be handled and 24/7 emergency services are available to ensure safety. Clients can trust the years of electrical construction experience and be sure that the professional team has the know-how to complete every project on time and within budget. The most competitive rates for residential, commercial and light industrial work is provided.

The electrical services include a range of tasks such as temperature control wiring, electrical renovations, structured wiring systems and service upgrades. The electricians at NED are fully certified to deliver Durango and La Plata County residents the highest quality of service. The electricians are OSHA-trained and compliant.

Night Light can plan and diagram electrical systems for clients, or can collaborate with architects or general

contractors to ensure that the plans include the necessary conduits required by local electrical codes. The company can be hired to fully design the system which is needed or will work with the clients from blueprints.
