

A Baltimore Plastic Surgeon Talks About CoolSculpting

April 18, 2017

April 18, 2017 - PRESSADVANTAGE -

Baltimore, Maryland, April 17, 2017 - Unwanted fat is a common reason many schedule a visit with a plastic surgeon in Baltimore. Those looking for a non-invasive way to get rid of stubborn fat can benefit from the innovative technology of CoolSculpting, says Dr. Jeffrey Schreiber.

CoolSculpting has been approved by the Food and Drug Administration (FDA) and is proven to be effective on particularly troubling areas including belly fat, love handles, and back fat. Not only that, it significantly reduces the potential risks and recovery time of more invasive procedures.

Patients considering a tummy tuck in Baltimore can also reap the benefits of CoolSculpting which cools undesirable fat cells and begins a controlled, natural loss of fat. Studies at the Wellman Center for Photomedicine in Boston, Massachusetts show that fat cells are vulnerable to the cold, and following exposure they begin a period a process known as apoptosis. During this period, which begins weeks after the CoolSculpting, fat cells shrink and permanently disappear.

CoolSculpting is done by the use of an applicator that provides controlled cooling of a treatment area. The treatment targets fat and no needles or other surgical procedures are required during the two hour treatments. Additionally, no downtime for recovery is needed following CoolSculpting. Patients begin to see

the results of the treatment in as soon as two to three weeks with the most dramatic and noticeable results taking place within two to four months of treatment.

In Baltimore, cosmetic surgery can refer to a lot of procedures, from tummy tucks to facial rejuvenation. Dr. Schreiber says that CoolSculpting is one of the newest and most exciting ways to get rid of fat that cannot be eliminated simply through diet and exercise. Schedule an appointment or a consultation to find out if CoolSculpting or any other procedures or treatments are the right fit by calling Baltimore Plastic Surgery at (410) 205-1846.

About Baltimore Plastic Surgery

Dr. Jeffrey Schreiber is an award-winning plastic surgeon at Baltimore Plastic Surgery.
